

Rhodes Youth Forum 2014

Name: Houssam Eddine Kassah Laouar

Country: Algeria

Project: *iQraaEducation*

Field of projects: Modern Learning Environment (MLE)

"iQraaEducation"

Slogan : 'Learning together - *معاً نتعلم*'

ALL PEOPLE KNOW ABOUT NETWORKING EDUCATION LEARNING FOR ALL

THE project is called "*iQraaEducation*" so we're all united in our desire to Use the technologies in Order to build a better life and a safer world

INTRODUCE TO PEOPLE "NETWORKING EDUCATION & LEARNING" world using new Technology

HELP PEOPLE TO REACH THEIR GOALS AND DREAMS

TEACHING PEOPLE IN THEIR SCHOOL ABOUT HOW TO USE AND LEAD YOUR SELF TO THE TOP

MAKE THE WORLD MORE NETWORKED , BETTER LIFE AND SAFETY FIRST

Our value:

- Caring about the Children life Caring about the Future
- Let Children's Ideas Grow
- Education for all
- Learning together
- Attending our Goals
- Making Children Dreams a Reality
- Change the way of the education was delivered
- Education for all learning together new things learning together amazing things

Main Idea :

Millions of children around the world suffering from the way how the information is delivered in their school (no education, no condition of life, no place for study, no teacher to teach them), but only 2% of them succeed in their life.

So our idea is why not 100% of them succeed in their life, we want to see all Children around the world learning and give them the chance to introduce themselves to the world and give them the chance to succeed in their studies also to give them some freedom and peaceful place to work and study to reach their goals and make their dreams a reality.

By building a network platform (virtual classroom) Cloud Computing Platform that assure the best way and change the way how the information is delivered to this people (Recruiting Expert and Teachers from around the world in specific domain and expertise) to teach children/Student in their houses specific and exact field of study and subject , they just need internet access to do it (by our platform that offer Video-streaming courses and training also competition camp's scholarship to student to learn more about culture civilization history and patrimony of people and cities around the world, since students that assists the class are from all over the world, in this case all children around the world have the chance to discover many culture and a lot of experience from the different teacher that teaches them from around the world & from their classmates

For example: The Teacher launch the virtual class room of Mathematics course , and children or student submit their application to attend it after the approval of the Teacher he/she Start the Online course where it's similar to the reality one

Like this we are all benefits and all people around the world learn new thing's learn Things they really love to learn by discovering and exchanging mind's '

Also the Teacher can share their knowledge and experience using our platform our international education interface that make relation between teacher and all Children (youth people) around the world to be more educated also to give the chance to those who hasn't any funds, or classroom in there town

So by using our platform all children can be free and educated we just need to assure the internet access in this place.

Also we are thinking to those who hasn't connection (or their life's condition is bad) By organizing workshop journeys and camps to sensibilites student and teach them the best way of how they can use new technology in their life and study in there school and we help them to establish a class contained the necessary equipment to join our platform and can be educated by using our virtual classroom

It's easy & simple to start, it just need persons of qualities caring about children's life in the future and believe in youth people for an educated world , for a world where the information comes from more than one world.

NB : it's just an idea so I didn't mention the technical detail also the marketing strategies, also we propose The Volunteer Teacher and expert to establish the program and choose the Virtual Classroom that can start with (there's a lot of idea and strategies in developing together we can do more better thing's) , that we can use it to start the project that can change the world of education and information is delivered to our children in their schools by new way's by using innovative thing's and new technologies.

About the choice of the program I am thinking for tow strategic:

1.The first One by field of Study and give the opportunity to Teacher and expert to choice his program by building One Education Program for all people around the world study the same system .

2.The second One and that I think it's more powerful for begin is to grade the same system of education of each country by making a partnership and collaboration with all the Ministry of education around the world so the student find on our platform all education system of all the country of the world so we give theme the chance to attend and study the education system that he want .

SWOT analysis :

Our partners :

- Ministry of education
- University
- High school

Education is the way of succulence people and generation :

We desire to give the chance to smart and intelligent student and youth people find the way to prove and develop their skills and knowledge with our staff and expert teacher that he can't find theme on the daily study (in their school)

WE CAN DO IT WE CAN SHARE EDUCATION the way is our platform , 200% cause of it's our world it's our generation so we need to built it we need to built a powerful educated generation by given

theme the best program and the way of education and how the information should be delivered to let theme draw their dream by their hands and give theme the opportunity to grow up and achieve their goals

In addition to our Platform and Virtual Classroom our Program is more than Virtual or Online platform our program is a reality is from Teacher to Student From Learner To Educator from person have experience to another our program is the way to success your life and achieve your goal by making and organizing: Stands, workshop, conferences in Universities High School and organize session of study also by visiting the small villages and exchange program with theme.

Budget :

<i>Informatics equipment+ Platform Development (Server, PC, Printer ,..)</i>	<i>25000 euro</i>
<i>Logistic equipment + Local + Office</i>	<i>20000 euro</i>
<i>Salary of Staff (starting with 5 person)</i>	<i>18500 euro (first year)</i>
<i>Marketing strategic and Plan</i>	<i>7500 euro</i>
<i>The big Project is to install Smart Class Room's prototype with the high and latest technology (at list One class in each country)</i>	<i>4000 euro + 40% of the benefice of the company go to this project</i>
Total :	<i>75000 euro</i>

Time : Jun 2015 we launch the version 1.0 of the platform

September 2015 we launch all services

How the company get money :

- *Publicity on the website*
- *Partners with Education Universities*
- *Online Library Bank*
- *Number of the Visitor*
- *Organizing special event and seminar conferences to professional access premium*

<< I believe I have a lot to offer to help population and generation of tomorrow to learn new thing's to learn amazing thing's so all my time and effort is offered to theme to make from my Dream a Unique International System of Education for All to let all people around the world benefice and been more educated >>

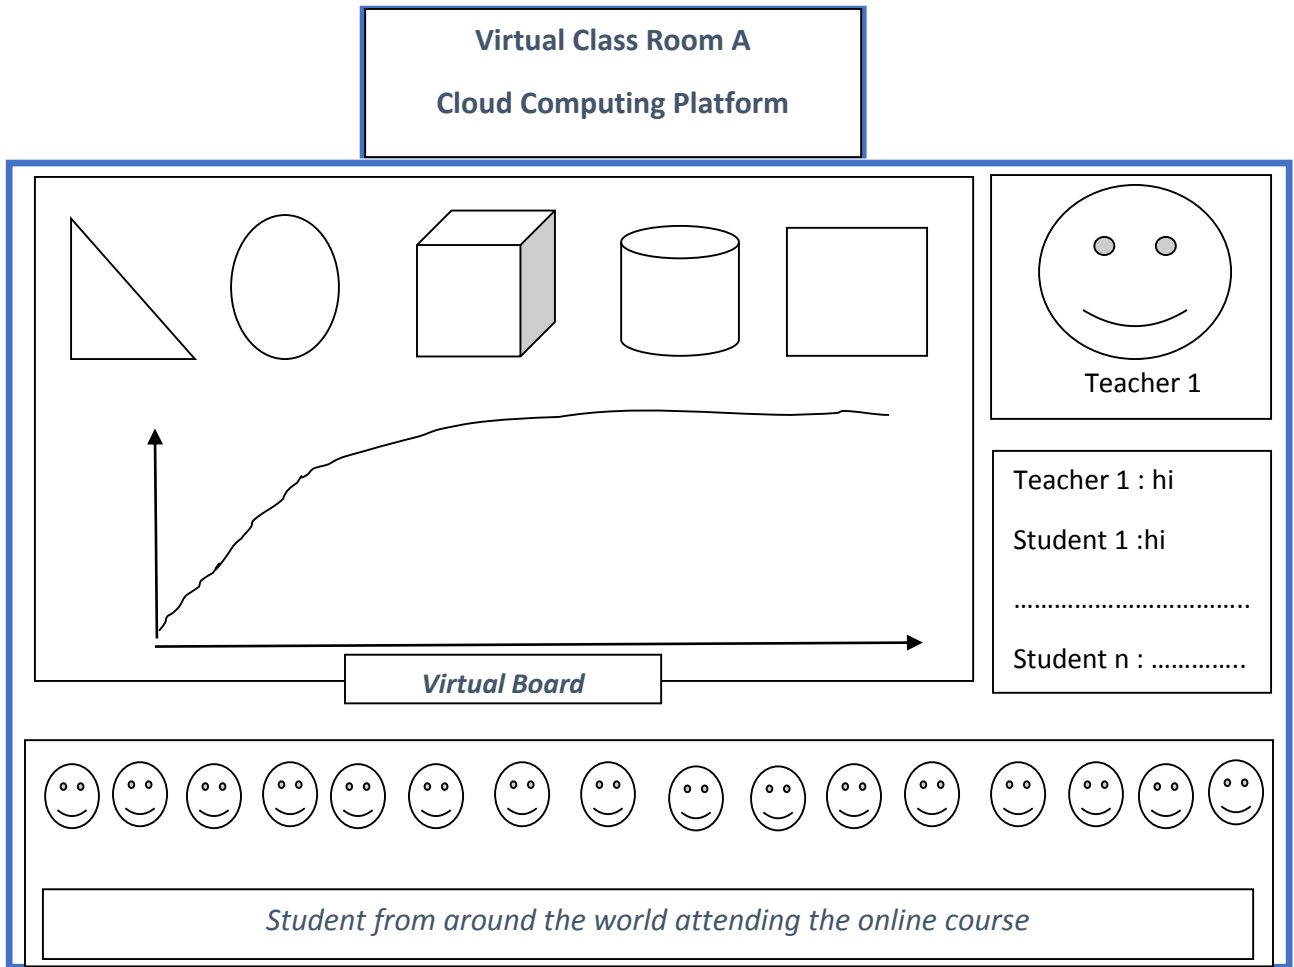

Figure 1 .:Prototype design of our cloud computing platform “the Virtual Online Class “

Any suggestion proposition critique advice are welcoming

We are here for one concept: “Learning Together- **معاً نتعلم**”
